## Drill & Drop Probe

Easy installation, accurate soil moisture, salinity and temperature measurement.

The Drill & Drop probe is fully encapsulated and can be completely buried, reducing the risk of machinery damage.

## **Features**

- · Tapered shape allows for extremely fast and high-quality undisturbed installation in majority of soil types.
- · Ability to measure the true soil profile, NOT slurry.
- Buriable to any depth.

- · Pre-normalised sensors with inbuilt default calibration equations.
- · Access soil profile data through IrriMAX Live.
- · Available with moisture, salinity and temperature sensors at every 10cm (4") depth.

|   |            | 120cm/48" | <br> |  |

## **Benefits**

- Best choice for short-term use, such as the monitoring of vegetable crops, due to the fast and easy install and extraction techniques.
- Reliable option for long-term use, as it can be installed and left untouched for many years.
- Manage irrigations to save water, power, fertilizer and time, along with increased yields and quality.
- Fast and undisturbed, slurry-free installation procedure, increasing the validity of soil moisture and salinity readings.
- Combine soil moisture, salinity and temperature readings to see what's happening in the soil profile.
