

# What's **NEW** in

# IrriMAX™ 8

The root zone interpreter

## NEW Features:

- More flexible graphing options
- Usability enhancements throughout
- New bar graph display, opening up a myriad of data presentation options and insights
- Easy comparison with historical data using time offsets
- Graph rulers show both totals and differences in values, enabling simple assessment of changing water contents over time
- Thumbnail views of graphs are shown in the Workspace window
- Manual entry of data from any sensor type, including SoluSAMPLER and irrigation and rainfall, directly into IrriMAX databases
- Ability to view and manage your databases directly from the Workspace window
- The Mail Graphs feature can send all graphs in the same email
- Mapped Readings module is included for data import

## Technical Information

- The minimum system requirements for IrriMAX 8 are Microsoft Windows 2000, 2003, XP or Vista
- IrriMAX 7.1 SP3 will be provided on the IrriMAX 8 CD for users of Windows 98, 98SE, Me and Windows NT 4. IrriMAX 7.1 is the last version of IrriMAX to support these operating systems
- Workspaces and graphs created in IrriMAX 8 will not be able to be opened and/or viewed in earlier versions of software
